---

I had a M07 serverside map for a while now and it worked fine. I have MCTs set up on my SP maps and for some reason I had PP's for both teams on M07 and the MCT's were not working. So I went back to level editor and switched it to Ref's, but then your Renegade would crash when you enter the game. So I went back and changed it to PP's again, but it still crashes again when before it worked fine?! Anyone know if there's any way to save the map? Cuz I would hate to have to start all over again...
