radioplug wrote on Tue, 30 December 2008 23:19Haha, the .key file is unfortunately encrypted...not like it would help if I decrypted it seeing that I would need to recover mine for The First Decade too (where there is not a .key file, I believe...or that I know of).

Thanks for your help. I guess I'll have to painfully wait the 3 weeks out until I can get my handbook back!

The .key file itself isn't encrypted, it's the encryption key needed to decrypt the serial number you have stored in your registry.
