Hey guys!

I'm expanding the web site that I'm currently working on (known as GenEdit2K, although I'm not the founder I am helping rebuild it since the founder, Morphius, has lost his Internet connection) into C&C Renegade and I need some files. Right now I have over 100 skins in our database, but these are old, from Morph's original site. Still don't have any maps or mods.

If you guys could upload any files that you want to be put on http://www.genedit2k.com when it opens up, please upload them at http://www.genedit2k.com/upload/upload.php .   The files must be in .zip format; please include your name, email address, and installation instructions in a readme.txt file in the zip.

Thanks guys!
