Goztow wrote on Wed, 21 January 2009 23:56 Let's say it all depends... Your Internet speed will often be influenced by other people being connected. If you have cable, it'll be affected by the number of people in your street surfing / downloading at the same time. If you have dsl, it depends of the overbooking rate your ISP uses in the nearby central. Usually the cheaper ISP's have a bigger overbooking rate.

Well with my niece on the pc i did 4 speed test all averaging out around 9-10 mb down and 7-9 kb up...but yet still vidoes acting the same?
