I don't really know much about SQL yet, here is a screenshot of when I got to my control panel and then click MySQL.

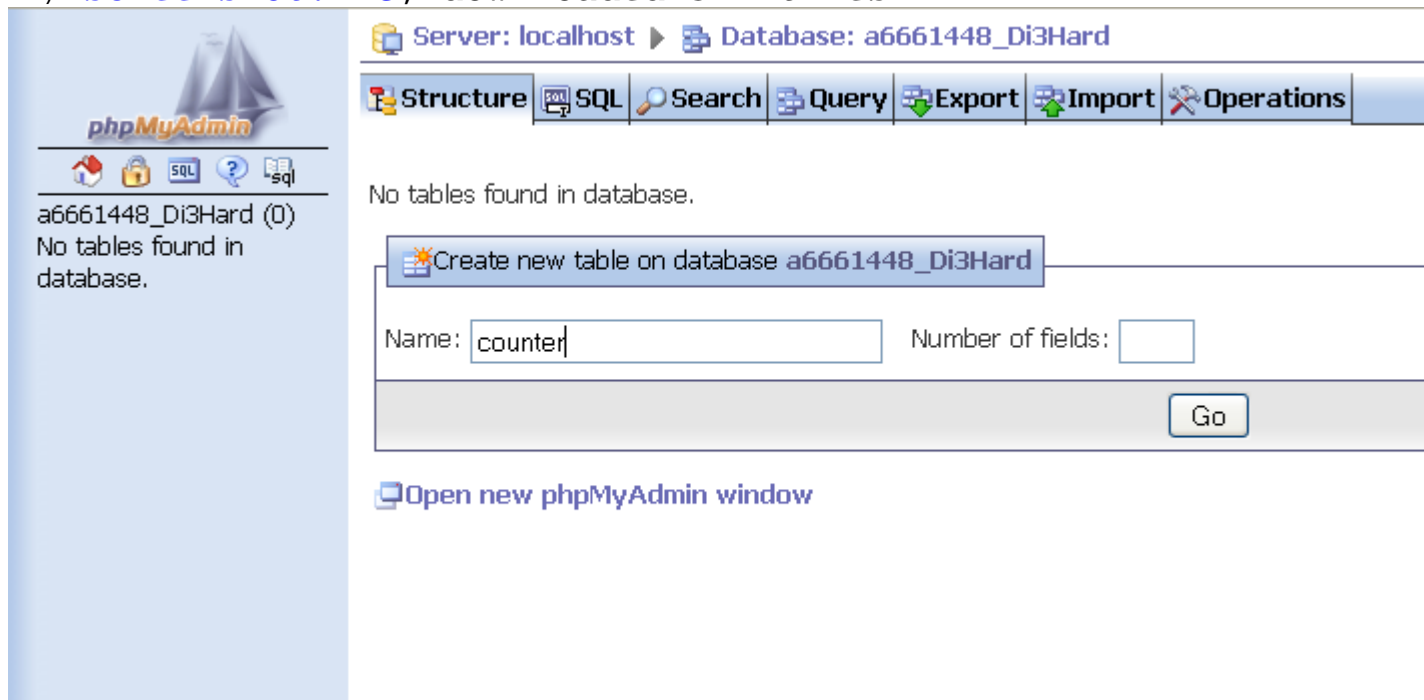

Then I created MySQL User

Then I got this screen. But I honestly don't know what to put there

The screenshot shows the phpMyAdmin interface. On the left is a sidebar with the phpMyAdmin logo and navigation icons. The main content area shows the server and database information: "Server: localhost" and "Database: a6661448\_Di3Hard". Below this is a menu with options: Structure, SQL, Search, Query, Export, Import, and Operations. The main area displays "No tables found in database." and a "Create new table on database a6661448\_Di3Hard" form. The form has a "Name:" field containing "counter" and a "Number of fields:" field which is empty. A "Go" button is located at the bottom right of the form. Below the form is a link: "Open new phpMyAdmin window".
