Being possibly the most popular, and funniest monologue here on this forum (only? O.o), and thanks VERY much to DJlaptop on making such a fucking hularious thing... I'd like to make a suggestion!

If DJ would be kind enough to distribute the background music, and those of who want to make their own version of this kind of like a kareoke. It can be done on TeamSpeak, if Blazer permits, then on his server aswell.

If you want to do it in Private, perfect it, THEN distribute it, by all means just use the audio recorder in your accessories menu

Just a suggestion =)
