February 2009 08:01heheh idiots that radar shows the exact position of a player, and if you change the radarmode you can see whenre the enemys are hided
you sir fail. Hard

its HARDCODED to only display info IF the object is on the same team.

It's irrelevant.

If i read correctly, the original problem with it isn't what was hard coded into it, but it shows what can be done, which means someone could now know, or even could be in the middle of creating one that shows where the enemy players are, whether they're in a vehicle etc....and it will keep expanding.

I don't think anyone sees the version shown on youtube as a cheat.

oh yes. because there have been MANY MANY versions of are-gee-h and the like after that was released. Gimme a break. The people who know how to do this would have already done it OR are too lazy and don't give a shit about it. The people who think "OH THATS COOL IM GONNA TRY THAT " without knowing wtf they are doing wont be making it anyways

are-gee-h ... aye aye captain! harr....harr.....
