(RAM) 4GB, 1.64GB free

I think something you're writing has a memory leak!

What the hell is using 2.36 GB of RAM???

Well, when I had that info grab, I was running one copy of OS-X in vmware, around 3 copies of Visual Studio 2008, one copy of Photoshop CS4, and Media Player Classic playing The Dark Night in 1080p on the second monitor. I'm surprised I had 1.64gb of free RAM
