SELFISH PRICKZZZZZZZZZ!

aw lol...yeah that's why nobody uses it unless they are playin the boring servers that need u to have RG.

And RG used to be good once upon a time before cheaters bypassed it.

What I would tell u do is to reinstall Ren. Or you can try to find the Renguard setup file in your Ren folder and uninstall it and try going online first.

If it stil ldoesn't work, I would just reinstall the game.
