Hey, I made a new weapon for Renegade. I got the handpositions for first persons right now. I saved it as f_gm_guit.w3d. Works fine.

Then I want to add a fire animation which I export as f_ha_guit_fire.w3d. But nothing happend, I also tried f_ga_guit_fire.w3d.

No results.

Do I have to add the animations in LE or something? I really don't know how to activate.

Here is a screenshot.
