Hello, i'm kind of new, i installed C&C renegade onto my pc, windows XP, it all works fine, no problems whatsoever untill i get to login in into westwood. I tried clicking new account, trying to create one, it shows page load failed or is invalid. I hoesntly dont know what is causing that. Please help me out

i read the other thread about password 8 characters long etc but it still didnt work for me. Everytime i did try out that thread, it takes me to a blank box with no servers appearing whatsoever. My renegade is not illegal in anyway, i just bought it. My serial is not from the internet, it was provided as i bought renegade.

thanks, -will-
