Hello, ive been working on a map in renx and i am 99% done with all the terrain, buildings and all the other fun stuff.. but i came to a dead stop when i imput a GDI silo that shows all the westwood logos and such when im in LevelEdit/ in game...I have all the TGA files in my level edit directory though

Is there any other GDI silos or any buildings in general i can download? besided the Renegade tools Buildings.zip

1 more thing, In LevelEdit...(preset tree) gives terrain, tile, objects, buildings... well in buildings theres a SP_nod silo but not one for GDI, how do u get the GDI silos to work? or even show up as being the "GDI Tiberium Silo" like on maps with silos.
