yes.

i was doing it manually

i have two zips

patcher and
patchall

now..patcher zip contains patcher exe. and patchw32.dll(i already have a file called
PATCH32.DLL in my Wwood directory)

the patchall zip only contains patchall.RTP

so i need to replace the existing patch32.dll with this new one and put it in the directory together
with patchall.RTP and then run the patcher.exe?
