O hoo noes wrote on Sun, 17 May 2009 06:37-since i cant edit my post-

how about finding the top of the wf and pp and changing them too to black/gold? cuz it looks kinda weird ingame.

The reason I didnt include that is because it changes both the nod and gdi pp and the area around the doors on both refineries. It also changes the base of the bar and agt. I've uploaded a darker one that should match the black buildings... just keep in mind the top of the nod pp will change also because they use the same skin. It looks fine though.
