---

General HavocspreegemMy com doesn't ever make a single sound at all.

Try turning it on j/k

So that's why it's not making a sound, is that also what is causing the Monitor to be black??  
LOL!!!! Seriousley though my com doesn't make a sound, BTW B4 I got my new harddrive, the old one made a sound like the one your talking about just before it died on me.
