Hey all,
I don't think I've written one of these since 2007
Anyway, just to bring those of you who are interested in the Dune universe up-to speed with the total conversion mod for Renegade, Battle For Dune.
For those of you who don't know what it is, Battle For Dune is a standalone, total conversion mod for C&C: Renegade bringing you the great gameplay from Emperor: Battle For Dune to a first person perspective.

And videos
Possibly some of the most interesting aspects of our game are in the videos, including a different method of harvesting, popup turrets and sandworms, all featured in Emperor: Battle For Dune

Of coruse, don't forget our official forums where you can keep up-to-date with weekly blogs, ask the dev team questions and maybe even offer your services (we are always looking for more members to help us finish the project).
Also, don't forget our moddb website, where well over 100 images and 15 videos exist.
