For example. you modded Walls flying. The map you choose is C&C_Walls_Flying.mix and the ldd file should be C&C_Walls_Flying.ldr. You choose the mix file and ldd is the file that mods the mix file.

Here i made an example for you.

Download that and put it in your Server/Data folder.

This will add two switches outside warfactories wall and you come, hit e and one gives you a char, another gives a vehicle behind you. You need to pick walls flying as the map.

Just one more thing. You said editing missions right? Well, just to tell that you cant edit m09.
