Jesus Christ!

Look at that! I've never seen something so unoriginal. You know what magican't's former url was? www.the-brotherhood.org! Even their irc address is unoriginal! "irc.magicalgaming.net"

LOL look at this:

The screenshot shows an IRC chat window with a dark background. At the top left, it says "06-24-2009, 08:56 PM". On the right side, there is a user profile for "Pyro Administrator" with the following stats: Join Date: Jun 2009, Posts: 80, Credits: 395 [Donate], Downloads: 0, Uploads: 0, Thanks: 18, and Thanked 2 Times in 2 F. The main chat area contains a message from "Pyro Administrator" with the subject "Custom Character Request Read Me!". The message text reads: "This is just a simple reward for contributors; Team members, bug reporters, code submitters and similar... *Hint* We like when our numbers in IRC grow. It is meant to give you a customized character for a lower-than-normal price to give you a small edge on the battlefield." Below this, there are sections for "Request", "Char", "Health/Shield", "Skintype/Shieldtype", and "Weapons", each providing instructions and details for the custom character request process.

Purpose

This is just a simple reward for contributors; Team members, bug reporters, code submitters and similar... "Hint" We like when our numbers in IRC grow ;) It is meant to give you a customized character for a lower-than-normal price to give you a small edge on the battlefield.

Request

[Start a new discussion](#) (Format comments as HTML) and use the following template:

```
<strong>Char:</strong>
<strong>Health/Shield:</strong>
<strong>Skintype/Shieldtype:</strong>
<strong>Weapons:</strong>
```

Special abilities will be granted on a case-by-case basis.

Char

This should be self explanatory... What character do you want? It's ok if you don't know the preset name, we can figure it out for you.

Health/Shield

Health points and armor points. Maximum is 500/500 to keep things fair.

Skintype/Shieldtype

These control how much damage you take from specific warheads, used by various weapons. Skintype regards your health meter, while Shieldtype regards your armor meter.

Possible combinations are as follows:

```
SkinFlesh/ShieldKevlar
SkinFlameThrower/ShieldFlameThrower
SkinChemWarrior/ShieldChemWarrior
SkinMutant/SkinMutant
```

Weapons

We do not currently have a scripts class to directly grant weapons so we must use powerups instead, that said, there are a few limitations such as alternate versions of weapons. For example RamjetRifle powerups only has 1 round before it needs a reload, whereas the real weapon has 4 bullets in its clip.

Available weapon powerups are as follows:
