tarsonis9For the past week, every time I try to play renegade online, my computer restarts in the middle of playing. No warning, Renegade doesn't close, My computer just turns off and on as if i hit the power switch. I get the same problem for every single other online game I have, and though this all started a week ago, one of my games, Medal of Honor: Allied Assult Spearhead, has been doing this for a few months now. Sometimes games crash a few minutes into online play, sometimes it can take up to an hour. I think it might be my ISP, America Online, because a game has never crashed while i wasn't connected to the internet. The games I have that crash are:

Medal of Honor: Allied Assult Spearhead
Command and Conquer: Renegade
Command and Conquer: Generals
WarCraft 3: Reign of Chaos
Microsoft Flight Simulator 2002

Any help would be greatly appreciated

Thank you

Here's a good question: Does the computer crash and reboot when you're NOT doing anything. Maybe like simple web browsing and such?
