The difference between the Nod and GDI rifle is humongous TBH. GDI rifle does 40% more damage. That's something that is VERY easy to find out without a level editor. You'd get suspicious when you'd win 90% of 1v1 rifle fights as GDI and only 10% as Nod (against a decent player)...or I don't know about you, but I certainly would.

edit: eh, gozy posted while I was writing...
