This was my 1st map made in ren-x several months ago...Infantry only with teleporters

The client would be way off the coords of the host and wouldnt be able to walk...I found that your map must be centered around or near 0,0,0 in ren-x during my near completion of a new map(Tib Pit 3)..

I went back and loaded this up centered it and finished it.

heres a link to d-load and give it a try

<http://renbattle.renstation.net/Lightwave.zip>

It's hosted on Renbattle(34player)server on GS...
