no the conspiracy theorist have it right for once especially when it comes to the pentagon. Really a plane hit that come on now?? all the video prove it was really a missile.

The government paid off the people on the plane or made up a fake passenger list. Either way they paid all those people off, the families, the air lines to all lie about it so the Bush could have his evil ways by attacking our own country.

Oh yeah and the fake plane its sitting on the bottom of the ocean with fake passengers. it all makes total sense.

Wait no maybe I'm thinking of the show lost
