No offence to you DJ, But none of that skin is REALLY yours, They are both remakes of two different files for the hummer (I won't mention who the files belong to, But I know this because I asked this for a skin before I could get Paintshop and do it myself)

Oh, And to the FDS, I am currently having some problems with the Nuke-Gaming BOX, So, It will take a bit before we can have the server up 24/7, Until then, I am hosting it on my personal computer (Which I hardly leaving running ever)

So, If you don't see the server there currently, It's just down for a bit. In about 2/3 Days maybe I'll have the server up 24/7.
