EvilWhiteDragon wrote on Wed, 21 October 2009 03:53Have you ran memtest? (memtest.org)
If you did, did you run it for more than just a couple of passes? (let it run for an hour of 4 minimum).
If you haven't, download and burn to CD, and et it run for at least 4 hours.
If you get errors then your RAM is BORKED.
Yep, give prime 95 a shot too, if it returns any errors there's a problem.
