It has been a while since I have been modding renegade, but mostly b/c of a TON of school work, and me tring to update my website (here), but I decided to come out with a new Halloween skin pack for CNC renegade to get away from all the stress. In this pack, the normal GDI Gold is changed to orange, some buildings have a Harvest moon on them (the WF distorts the moon though), and there is a special surprise for anyone who can find the real in-game fullmoon

Download at Samous Ind. File base here(RAR), or CNC Renegade forums(ZIP) bellow.

Install by adding all the .dds files to your renegade data directory.

EDIT*1: Seams my upload was premature, I forgot to add two texture files, the new ZIP and RAR files uploaded have the updated files, sorry.
