Subject: What should my bandwidth settings be?
Posted by GoTWhisKéY   on Sun, 15 Nov 2009 16:17:41 GMT

On a 1/2 meg upload, how many players can I host? This would be a clanwar server so it doesn't need much more then 8 or 10. (if it can even handle that).

In server.ini, should I leave 'bandwitdh up' set to automatically detect'?
and should I set the NetUpdateRate to 10,20,25, or 30?

Thanks for the help.
