...

To tell ya the truth, the lag cheat is a joke. that 1 week I did use it I realized it does more harm than good. If you don't shoot the enemy ithin 2-3 seconds there is a 95% probability that you die...

Why the phuck pick on me? I have not used it SINCE I was kicked. I don't know what your screenshots are about. What about all those who use the bighead, Damage hack, and clickbots?

And maybe hareman... I don't respond as often as you do because I don't sit next to the computer all day, hitting refresh to see if there is a new post,
I have a life which comes BEFORE computer gaming. But you will probably flame me for that as well, because you have no clue what I'm talking about :rolleyes:
