luv2pb on both.

I haven't actually twittered in a while. If you play Mafia Wars on FB hit me up.

They are useless and stupid but can be fun. I consider these forums stupid and useless yet I still visit them daily ... actually most things I do on the internet are useless and stupid. FB does have some usefull functions. I recently started using it to get in touch with some olds friends from high school. I also recently FB stalked the first girl that ever rejected me (lolgoodtimes).
