---

Sorry for the double post but this is an update on adding it through scripts.dll  
First it wasnt really through scripts.dll, it was with HUD.ini

1. Adding it seems successful; Titlebar changes
2. Our goal is not reached; Stealth Effect didnt change :V

So it isnt that easy

UPDATE:

I added some files from the apb always.dat which works partially.

[Toggle Spoiler](#)

So it kinda gets stuck at the white part  
It should go transparent on stealth and completely gone on unstealth but it doesnt
