heh. Another game. This is a little different. One person posts a wish. The next poster then has to say, "Granted, but..." and then corrupts it. After that, he then puts his wish, and so on.

Example:
Person 1: I wish I had a hand grenade.

Person 2: Granted, but it explodes in your face.
I wish I had a pony.

Person 3: Granted, but it hates you and runs away.
I wish I could go to Universal Studios***

And so on.

I'll start:

I wish that so many people didn't cheat online.

***(Theme park and movie studio obviously for Universal Studios)

1337Peen fag.
I wish I had a better cpu.
