Maybe give them a call on their 1-800 number, and see if that will net you any help. Also, check their forums, and search for this error, and your modules, and see if anything comes up.

Their memory section is actively staffed and moderated, so if you give them all the details, you should get help there.

Edit: I quickly poked around, and you'll probably have better luck just searching for 'MEMORY MANAGEMENT' without the numbers.
