Why would they do that? Didn't get enough support that you want?

You sir disapoint me. I've respected u for years, but teaming up with these people shocked me.

Note to everyone about our friend Blacky. Don't give him access to your fds's/box access or w/e. He'll steal your maps as he done with TmX's. Then when we kick him out, he'll sabotage our bot by joining on BRenBot exploits such as ''happyface'' which crashes our bot.

So, this topic was 'Dont use atomix forums' I've got a better idea. Don't fucking trust Blacky/MrNiceGuy.

Retrieved logs from our bot at TmX.

That sir, earnt you a global ban. Banned on irc, forums & from our servers.

We can't prove that you used ''happyface'' because you used a proxy, but we can prove that you used happyface because it shows from your IP log. Currently can't check as '[April 20] {15:47:50} <[~TmX]> The IPDB server is currently offline...'

So this is jus a reminder to anyone to do with Blacky, don't trust him and never give him access to

your private files.
When you have some proof I would love to see it. It's pretty convenient to blame blacky. It is also funny that you say he is using a proxy when he thinks jesus was born on easter. So basically everything you just said is circumstantial and you have no real proof of anything. Thanks for telling us how big and bad blacky is when he has contributed more to renegade than you ever could.
