Yeah,

Stealing our stuff.

What stuff? His bot? The maps he remade for our server? The sound pack he made?

Registering players name's without informing/asking us.

It may of been stupid for him to test it on your bot, but no one said he was smart

Joining on BRenBot exploits.

Again I would love to see some evidence before you blindly throw out accusations.

No one in there right mind, wouldn't ban you...

SO far he is guilty of using things he made on a different server and register some names that can
easily be unregister. Wow, talk about a server killer. This kid is a bigger hacker then c4cmoke.

I'm glad people have seen the 'true blacky'.
I don't think they have considering he hasn't made a spelling error in his posts yet.
