intimdatr wrote on Fri, 14 May 2010 20:44is there any way possible to get Ren to work with windows 7???
I got Win7 and it have never crashed upon me, well i got bluescreen one time, but thats cause i filled Ren with alot of stuff XD but that dosnt matter.

What i did was install it like you normaly do, and then i ran the EXE file, game.exe.

Also im the only user on this PC, might need admin or something   gl hunting
