Not too much, other people do it better.

Here's a good start:

<http://compreviews.about.com/od/cases/a/PSUWattage.htm>

<http://www.wikihow.com/Buy-a-Power-Supply>

Here's the webpage for the Kingwin power supply.

[http://kingwin.com/products/cate/power\\_supplies/lz\\_750.asp](http://kingwin.com/products/cate/power_supplies/lz_750.asp)

The WikiHow page lists Kingwin as a 'low quality' supplier, but anyone can say that. It's up to you to do your research.
