Subject: Re: RenLadder updates
Posted by Crimson on Sun, 22 Aug 2010 00:22:37 GMT

Any server connected to XWIS that has set our ladder server's IP in their hosts file will send data compiled by the game server to our server.

The only way to remove or adjust these bad results is to have someone in charge of moderating the ladder data and give them access to tweak or remove fault results. Alternatively, we could ban servers from the ladder who are sending this bad data which is less work.
