Ethenal wrote on Tue, 17 August 2010 19:20P.S. Is it just me who cringes at halo's posts?

Why would you cringe at my posts?

I stated that I created something like this 6 months ago but more sophisticated. And that having a TCP based message system is awesome.

I wasn't trying to steal focus from Dan Paul's although it did look like that, but he isn't releasing it yet and I decided I would release mine since it had more features and people need something like this now not later.
