macYou know.. We don't appreciate n00bish whining about features that were never planned to get in - WOL is one of them, or rather the only feature that's missing in the LFDS. Instead of whining you should appreciate Greg's work. He has done a quite remarkable job.

Personally - i don't care on what service my servers run to. All i care about is that people can play on it.

I completely agree here at least you can play it...

Please try to respect Greg's work.
