I've been making the map, after a while the whole terrain was missing. I wanted to add it again by going to Terrain-->Levels-Single Player-->Level_10 0319. When I press one of those, it won't function at all. There won't be made anything. All of the other terrains did work. So I reinstalled everything, but still the terrain of Mission 10 won't be loaded...

I don't know how to make it possible to add the terrain again. Maybe someone else does?

EDIT: Solved, just uninstalled renegade and all other components and then installed, instead of just uninstalling Renegade Public Tools.
