papaelbo wrote on Mon, 06 December 2010 01:11Hi, thanks for letting us be a part of the server testing. Had some crazy 700+kbps at one point and a number of client crashes but it was good to stick around and help out.

Just a quick demo video of the weapon glitch i found which basically made my hotwire rushes useless (until someone pointed out you can still press the weapon number!).

<http://www.mediafire.com/?rimqujbnxk3xl3b>

Also have a number of crashdump.txt files if you need them.

That "glitch" already existed in the leaked 4.0 files.

Sorry guys, couldn't resist to just test them. I deleted them after trying so no worries
