I see this bug a lot its not that rare. It would be nice to see if fixed but it is not a big problem.

The gray name "ghost" bug is even more of a pain in the ass tbh....it happens when a player direct connects to a server he is already in, while using the same nickname. He joins with a grey name after doing so, and other players who direct-connected cannot see his points, credits, kills, deaths, etc.

That is from Resurrection and its when the a player is in game and reconnects and replaces the ghost. Sometimes it doesn't update for the client.
