LOL You of all people should know that I didn't create Final Renegade. Ty of the former WSE put my name and several others in as the creator as an attempt to trash my reputation. And not surprisingly, a few idiots actually fell for it. I have explained this on the FAQ on RenGuard.com for several years.

I do now know how to make maps, or mod, or do any custom coding inside Renegade. I do not have the knowledge to make cheats.

The fact that you admit you have attacked people with botnets and have cheated in the past pretty much proves my point, and that is why I will never participate in your community.

That's why you started this thread, no?

[Edit: I don't know why you say that I think I'm better than anyone just because I own these forums. Sounds like you're just getting a bit defensive on being called out on your shit.]
