Hello, I recently installed the new scripts, and now whenever I try to play Renegade I get an error:
"The procedure entry point

?CheckMemoryManagerConfiguration@@YAXH>@Z could not be
located in the dynamic link library MemoryManager.dll."

Needless to say, this is very upsetting. Renegade is the only video game I play, and I love it. I
don't know much about computers, so that error text may as well be Greek. All I know is that I do
have the MemoryManager.dll file. I tried uninstalling and reinstalling Renegade, but no dice. I
have attached a screen shot of my troubles. Does anyone know how to fix this? Thank you in
advance.
