It's finished and ready to go. Hope everyone enjoys. If there's any game-breaking problems, let me know, otherwise it should be a fun frag-fest.

Theatre: Secret Nod temple

Description: This is one of the last unfinished Renegade levels. It was meant to be Capture the Flag, originally, but the game doesn't support that mode. I've made a lot of aesthetic changes, light mapped the Hand of Nod interior and the level itself, and have added fiery torches to light your way across this barren desert moonscape. There are some changes to be aware of:

Grenadier, and Rocket Soldiers/Gunners fire a triple burst alt-fire.

Flamethrower does extra damage at a shorter range as an alt-fire.

Enjoy!
