Yeah, you used to love pissing me off by installing scripts 2.3 after it took me about an hour to convince you to get 3.4 :/ Other's thought you cheated and it was either force you to get 3.4, or waste time spectating a player that I knew didn't cheat. You never knew that did you.

I knew of people thinking I cheated, I knew many were watching me. Didn't know I was constantly getting spectated though, lol.

And I didn't diliberatly not run 3.4 back then just to piss people off. For some odd reason, it would fuck up Ren, fps drops, lag, so I never installed it. Stayed with 2.+ and just used 3.4 whenever I did my little 1v1 vs you ^^
