Place a keys.cfg file with the following content in it in your My Documents -> Renegade -> Client folder. Make sure there's a blank line at the end of the file or the last key listed won't work:

<http://pastebin.com/kqcKY4A1>

You can edit that file directly to edit key bindings or you can go ingame to Options -> Extended Options, it shows a list of keys.cfg keys at the top of that screen and you can change them like you can change the normal controls ingame.
