I stand corrected; it was actually deleted on my laptop, thus its Symantec Endpoint Protection's Proactive Threat Protection that deleted Game.exe.

As you can see it marked it as a Bloodhound.Sonar.9.

The screenshot shows the Symantec Endpoint Protection 'View Logs' interface. At the top, there is a navigation bar with a shield icon and the text 'View Logs - Symantec Endpoint Protection'. To the right of the bar, the text 'Scheduled Active Scan in progress...' is displayed. Below the bar, there is a sidebar with links: 'Status', 'Scan for Threats', 'Change Settings', and 'View Quarantine'. The main content area is titled 'View Logs' and contains the message 'The logs you can view are listed below.' To the left of this message is an icon of a shield and a computer monitor. To the right, there is a section titled 'Proactive Threat Protection Logs' with tabs for 'System Log' and 'Threat Log'. Under 'Threat Log', there is a table with two columns: 'Filename' and 'Risk'. The table contains one entry: 'game.exe' with 'Bloodhound.' under 'Risk'.

Filename	Risk
game.exe	Bloodhound.
