StealthEye wrote on Sun, 20 November 2011 17:33 Sounds good, but from that screenshot it seems that you previously downloaded beta 1. In that case I'm not sure if we can conclude that this is fixed.

It appears that Norton allows 4.0beta2, but still QUARANTINES 4.0beta1, which is posing the same problem, the updater is not working. When I try to join thru Steam, it tells me the updater is not working, and the program is not up to date.
