nikki6ixx wrote on Sat, 07 January 2012 18:51 So is there a recent location where someone can download the necessary files? The links in this thread do not work.

There's one under the st0rm.net download section, but you need a st0rm.net forums account. Also you need to delete config.dat in My Documents\Renegade\Client after playing once, it's a small bug.
