Xtrm2MattOk i had the same problem

1. Move all the DLL files into C:\WINDOWS\System32

This should work, however it didnt for me soo...

Download .NET Framework 2 (not 1.. or i got version 2 and BR .NET works for me   now..)

EDIT::

I didnt have the 'JIT' error, just the 1st one :rolleyes:

I did the move thing and that don't work but what you mean version 2 I just got the newest one which was in beta and was certainly not version 2 :/ .
